Dear Team Altair,

I wish to apply for the role of Trainee - Data Science, currently being advertised on linkedin.com. Please find enclosed my CV for your consideration.

As you can see from my attached CV, I have over 3 years' experience as a software developer in IT and Portal/Website domain. Having worked my way up to a Senior Software developer, I'm ready for a new challenge in the Data Science industry, and see this position as the perfect role to help me achieve this.

I'm particularly interested in working in Machine Learning, Data analysis and Deep Learning projects because of my passion for developing software and researching to achieve business in-sights, something I've had extensive experience of during my time in learning through various MOOC courses online, in the past year. I have earned many certification and badges by completing hands-on courses online with one to highlight is the Microsoft Certificate in Python programming. I believe I am ready and very keenly looking forward to explore my attained skills by applying them to real world data to solve problems and enhance business opportunities for the client.

Thank you for your time and consideration. I look forward to meeting with you to discuss my application further.

Yours sincerely,

Gurubux Gill
